

Light up the world with eco-friendly led lights

TYPICAL LED PAR30 BUSINESS

The number of hours per day the light will be used	16
Based on 7 days per week, this application will reach 40,000 hours in this many years	6.85

Halogen Lamp Cost	\$10.00
Typical Halogen Lamp Life (hours)	2,000
Power rate in dollars/kwh	\$0.10
Estimated cost to procure and replace each lamp on a per incident basis	\$1.10
kWh used by a 75 Watt PAR30 halogen in 40,000 hours	3,000
Number of halogen lamps required to provide light for 40,000hours	20
Cost of halogen lamps (number of lamps * cost per lamp)	\$200.00
Cost of electricity to run a 75 Watt halogen lamp 40,000 hours	\$300.00
Cost to procure and replace a halogen lamp over 40,000 hours	\$22.00
Cost of running an Energy Star air conditioner to compensate for the heat	\$78.75
Total cost of owning and operating a 75 Watt halogen lamp for 40,000 hours	\$600.75

Everbright LED Lamp Cost	\$68.00
Everbright LED Lamp Life (hours)	40,000
Power rate in dollars/kwh	\$0.10
Estimated cost to procure and replace each lamp on a per incident basis	\$1.10
kWh used by a 10.5 Watt PAR30 LED in 40,000 hours	420
Number of LED lamps required to provide light for 40,000hours	1
Cost of LED lamps (number of lamps * cost per lamp)	\$68.00
Cost of electricity to run a 10.5Watt LED lamp 40,000 hours	\$42.00
Cost to procure and replace a 10.5Watt LED lamp over 40,000 hours	\$1.10
Cost of running an Energy Star air conditioner to compensate for the heat	\$11.01
Total cost of owning and operating a 10.5 Watt LED lamp for 40,000 hours	\$122.11

Total Savings realized for each lamp replaced	\$478
Payback in years	1
Energy Conservation	86%
